

# ARENS ARC-3

24V/DC control unit

## Description :

The ARC-3 Unit is an electronic board for the automation of doors and windows with the help of electro-mechanic actuators.

Power supply unit for ventilation system for use with "Arens" chain actuator 24V/DC ,rod actuator 24V DC and rack actuators 24V/DC.

- 24VDC max 10A output for operator power supply
- Control inputs for open / stop / close
- Can be connected in parallel with other ARC-3 units
- PVC box Size : 265mmX185mmX100mm
- Protection class : IP56
- Battery back up Function
- Optional wireless remote control
- Power indication light
